

TUDOR

DIVERS'
WATCHES

SETTINGS

SCREWED-DOWN POSITION [position A]

Your TUDOR watch is equipped with a screw-down crown. Once this is fully screwed down against the case, your watch is guaranteed waterproof.

MANUAL WINDING [position B]

A watch equipped with a self-winding mechanical movement is wound automatically by wrist movements alone. To ensure optimum winding, wear your watch daily.

Before you first use the watch or if it has stopped, you will need to wind it manually by unscrewing the crown and then turning it clockwise; the other direction is inactive.

TIME SETTING

[position C without date and position D with date]

In order to adjust the time, unscrew the crown and pull it out to the last notch. Then turn it in either direction until the hands indicate the correct time. The small seconds hand is stopped during this operation, allowing the time to be set accurately.

For the models with date, if the watch has stopped, take care not to confuse midday and midnight during this operation. Move the hands forward to 12 o'clock; if the date changes, then it is midnight.

RAPID DATE-SETTING [position C]

In order to adjust the date, unscrew the crown and pull it out to the second notch. Then turn it counterclockwise until the desired date appears in the window. The date is corrected when the hands pass midnight. During this operation, your watch will keep running.

BEZEL FUNCTION

The unidirectional rotatable bezel allows precise measurement of dive times. For safety, the bezel rotates in one direction only. It is deliberately harder to turn when the zero marker (triangle) is in the 12 o'clock position to avoid inadvertent rotation.

Before beginning your descent, turn the bezel until the triangle on the graduation is opposite the minute hand. This indicates the beginning of the dive and is visible in the dark. The duration of the dive is indicated on the graduation on the bezel by the minute hand.

HELIUM VALVE

During dives in a hyperbaric environment, superfluid gases penetrate the watch. This decompression valve allows them to escape during the rise to the surface.

ADJUSTING THE BRACELET

TITANIUM, RUBBER OR FABRIC

The Pelagos model is equipped with two bracelets, one in titanium and another in rubber, which compensate for variations in the thickness of the dive suit due to water pressure.

The Black Bay model is available with a fabric strap. The length of the fabric strap can be adjusted by sliding it through the buckle and loops.

RECOMMENDATIONS

Bronze: Your Black Bay Bronze is designed in bronze, in this case a high-performance aluminum bronze alloy, which guarantees the development of a subtle and unique patina to match its user's habits.

Cleaning: Use a microfiber cloth and wash the metal, rubber, fabric bracelets and waterproof cases from time to time with a soft brush and soapy water. We recommend that you do not use abrasive or corrosive products (solvents, detergents, perfume, etc.).

Guarantee: Refer to the guarantee manual supplied with your watch.

Leather: To preserve your leather strap, we recommend protecting it from water and moisture.

PVD: Your Black Bay Dark is finished with a black coating obtained using a Physical Vapor Deposition (PVD) process. Although the coating is extremely resistant, regular wear and tear can cause this decorative layer to deteriorate over time. The warranty does not cover this type of aesthetic wear.

Salt water: Always rinse your watch with fresh water.

Screw-down winding crown: After each operation, remember to push the crown back in and screw it back down carefully against the case, in order to preserve your watch's waterproofness.

Service: Each TUDOR watch is a complex precision mechanism and, as such, requires periodic servicing and maintenance to guarantee optimum performance. Expert TUDOR servicing can be carried out via any of the Official Jewelers and Service Centers in the extensive ROLEX or TUDOR service network. Visit TUDORWATCH.COM to view the list of Official TUDOR Jewelers and Service Centers in your area.

Strap: Only Official TUDOR Jewelers are authorized to change the watch strap.
